

## A Recognized Expert...

CrossPlatform DeSign LLC is a recognized expert in the use of Demonstrative Visualization. Through the use of computer simulation, we specialize in the visualization of complex scenarios into interactive tools. We create training tools that are litigation ready and will stand up in court if training is called into question.

We use our years of court experience to give our clients an edge in training.

In fact training costs are cut immediately when organizations deploy our tools into their training methodologies.

## Blended Learning...

Our staff has over 32 years of experience in corporate compliance and blended learning and 11 years in litigation Injury defense.

We convert any subject-matter content into visuals that help learners retain training longer and have access to refresher training any day of the week.

## Key Advantages:

- **Increase learning and retention**
- **24/7 access to training**
- **Immediately reduce cost**

Train 24 /7 Anytime Anywhere

### Virtual Train Yard

Employees can take a virtual walk-through tour of a hazardous work environment without risk or liability and practice training.

Watch from any angle as parts come off in sequence.

## OSHA COMPLIANCE CUSTOM INTERFACE

Our simulations train employees on safety standards to reduce injuries and increase production.

Our web tools are based on each client's needs and contain custom drop down menus and controls for ease of use.

### Exploded Views

We take schematics and generate operational models that simulate the actual function in a emersive browser based tool.

### Interactive Controls

See real-time operation of equipment and functions as if actually being in direct contact with equipment without the danger of damaging costly and sensitive mechanisms.

### Interactive Training Modules

We assist corporations in developing customized interactive visual training for Safety, Operations, HR, OSHA, and maintenance.

Use your mouse and keyboard to tilt and swivel in real-time without the use of costly software.

### CrossPlatform DeSign Services LLC:

- 24/7 Anytime anywhere training
- Cuts training cost quickly
- Train on web, hand held and mobile devices
- Train the trainer, evaluation and support services
- Interactive self-paced tools
- Consistent with ASTD principles

### Past Performance

We showed a Fortune 500 company how to save over a quarter of a billion dollars on production and training.

Our clients range from large city government, law firms and corporations throughout the United States.

### Competency Based Blended Learning

We use a combination of tools to help trainers analyze, evaluate and improve training to ensure that dollars spent on training are effective and produce results.
